

XPUMP Premium - 3D Audio Processor

Embrace Audio Lab Inc.
英霸聲學科技股份有限公司

[Company Website](#)

Booth No. INNOVEX A1229

Winning Reason

- Easy installation and connection to devices such as PCs, gaming consoles, speakers and headphones.
- Enhanced sound details with patented algorithms to provide a better listening experience in entertainment scenarios such as music, movies, and games.
- Although it is only SME, it accomplished great sale results through crowdfunding platforms, proving its product value in the market.

Product Feature

- IMMERSIVE EMBEDDED 3D SURROUND SOUND, plug and play design connects direct to your audio device, no additional settings or installations required.
- VIRTUAL 7.1 via patented XROUND digital signal processing algorithm giving you the smallest portable home theatre system in the world.
- GREAT COMPATIBILITY as external surround sound card works with your mobile/ Windows PC / Mac / PS4 / Nintendo Switch, simply connect to your headset or speakers and enjoy great sound.
