

## AORUS AD27QD Tactical Gaming Monitor

**GIGABYTE™**

**GIGABYTE TECHNOLOGY  
CO., LTD.**

技嘉科技股份有限公司

[Company Website](#)

**Booth No. S0512**

### Winning Reason

- AORUS Gaming Monitor's design symbolizes to soar on wings like an eagle, sending the message across to gamers subliminally. Through understanding the gamers' needs, it also implemented a handle on the back of the monitor to avoid overextending the corners which may affect where gamers place their keyboards. This thoughtful consideration in the design deserves recognition.
- As for hardware specs, its ANC microphone is placed in the front right below its logo, which can reduce surrounding noise effectively. The refresh rate is also the highest among its competitors that ensures smoothness for optimal gaming experience.

### Product Feature

- The design concept is from a falcon diving after it's prey. Using digital LEDs to represent the flapping wings.
- Active Noise Cancelling (ANC). Provide gamers clear communication quality.
- OSD Sidekick. Adjust you monitor settings or activate the tactical features if the monitor with mouse and keyboard.
- Customized crosshair. Gamers can draw their own monitor crosshair.
- Timer, Counter, Dashboard, and other tactical features support gamers in-game.
- 1ms, 144Hz, 10bit color IPS panel
