Booth No. L0818

Winning Reason

- Equipped with strong processing power of the 9th Generation Intel 8-core CPU and NVIDIA's GeForce GTX20 Series GPU inside a 10L PC case.
- Divides CPU, GPU, and PSU into 3 zones to avoid heat accumulation, providing high efficiency cooling solution.
- Hardened glass side panel that is both stylish and easy to remove for upgrades.

Product Feature

- Trident X Plus, With the mere 10 liters in volume, has all the components that are usually found in big tower cases, including Intel 9th K series CPU and NVIDIA GeForce RTX 2080 Ti graphics card. Besides the powerful GPU and graphics card, Trident X Plus also supports up to two 2.5" HDD, 2 M.2 PCIE SSD and 32GB DDR4 memory. The power supply of Trident X Plus is also preinstalled inside of the chassis so that users don't have to an extra adapter that is both big and heavy.
