[Company Website](#)

**Booth No. S1417**

### Winning Reason

- Very unique product that can transmit wirelessly without WiFi setup and app installation. QuattroPod makes presentation easy at anytime and anywhere.
- Diverse I/O support, cross-platform support for Windows, Mac, iOS, and Android, along with the newest smartphones and tablets.
- Easy to use and can input/output up to 4k resolution. It can input multiple video sources and display in split-screen mode.

### Product Feature

- QuattroPod is designed for next generation of BYOD offices and meetings rooms.
- No matter Android, iPhones, Windows, Mac laptops or tablets the presenter uses, he can plug and play to create wireless presentations to 4K screens with a simple click.
- The secure, point to point Wi-Fi connection between QuattroPod transmitter and receivers means a guest presenter does not require the guest Wi-Fi permissions to join meetings.
- It also allows up to 4 presentations to be displayed in split-screen mode.
