Winning Reason

- ASUS's award-winning Mini PC ProArt PA90 product, in addition to Intel's new ninth-generation CPU, uses a water-cooled cooling method for quiet use. In addition to the design of the inner appearance, it also jumps out of the appearance of the PC.
- Targeted by image creation or industrial design, as well as designers of various architectures and planes, it provides a convenient combination of images, photos and creative content in the design process.
- This product combines intrinsic powerful features with an elegantly designed look that adds value to ASUS' R&D and design capabilities, so the review is consistently recommended as the Golden Award.

Product Feature

- Powered by Latest Intel® 9th Gen Core™ Processors and NVIDIA® Quadro® graphics cards
- Quiet and efficient liquid-cooling solution ensures long-term, high-performance stability
- Supports up to two M.2 PCIE storages and Intel® Optane™ Technology, for incredible responsiveness and data transfer speed
- Elegantly curved design blends perfectly with any creative environment
- High compatibility and reliability with professional applications – ISV certification
