

Realtek Bluetooth 5 ANC Smart Headset SoC (RTL8773B)

Realtek Semiconductor Corp.

瑞昱半導體股份有限公司

[Company Website](#)

Booth No. T101A

Winning Reason

- This is a new generation of active noise reduction intelligent voice solution that is not only focused on voice assistants, but also its assistive IoT functionalities.
- Realtek's Bluetooth 5 ANC Smart Headset SoC (RTL8773B) matches the 2nd generation bluetooth voice solution with its perks such as high performance, low power consumption, active noise cancelling, remote and high sound quality.
- This product suits the most requested application needs to equip IoT devices with voice solutions, linking these bluetooth devices with IoT.
- It is equipped with Bluetooth 5.1+ANC SoC that reduces RBOM and design space.

Product Feature

- The RTL8773B is the ideal ANC (Active Noise Cancellation) Bluetooth 5 Audio SoC for AI Headset application. It supports the latest Bluetooth 5 specification and Hybrid ANC, and also provides very low power consumption during music-playback and phone conversations. The RTL8773B can help makers easily upgrade to a premium model with ANC plus Bluetooth function, as well as offering high-resolution audio quality for a better user experience.
