[Company Website](#)

Booth No. P0114

Winning Reason

- The newest 360-degree smart wireless antenna product that employs the “Pattern Based Portable and Efficient Smart Antenna Steering Algorithm” and “Visualize Smart Antenna Performance” technologies to facilitate the process of finding the optimal antenna orientation.
- Radiation is no longer confined to a fixed pattern, exhibiting extraordinary malleability to accommodate to different environments, which can help wireless products overcome antenna dead zones and improve overall signal quality
- Wide range of applications for a variety of wireless products with significantly reduces cost.

Product Feature

Gemtek Tern Smart Mesh Wi-Fi System incorporates the “Pattern Based Portable and Efficient Smart Antenna Steering Algorithm” and “Visualize Smart Antenna Performance” technologies:

- Effectively maximizes network coverage and speed
- Signal strength: Uni-directional 200%, Bi-directional 400%
- The compact-sized antenna could be Adapted in various platforms or applications
- With 12 multi-color LED easily identify beam directions and antenna status
- User-friendly APP easily control antenna direction
