### Winning Reason

- High pixel, wide angle dual cameras, and 5000mAh high capacity battery fulfill the user needs today. Twilight Silver and Midnight Black of body colors can emphasize its futuristic style as well as the ergonomic 3D curve glass and wedge design.
- Among the products that pursue for performance, ZenFone 6 comes with 6.4 inch Hyperboloid display, and its camera module structure is made of liquid metal. The phone not only is equipped with high-end specs but also priced reasonably, making it stand out among its competitors.

### Product Feature

- ZenFone 6 has an innovative camera system with 48MP high-resolution dual ultrawide front and rear cameras, removing the limits on creativity. It also has an all-screen NanoEdge display for an immersive viewing experience, a 5000mAh high-capacity battery for long endurance, and a 3D-curved glass and wedge cover design that are both visually attractive and comfortable to hold. ZenFone 6 incorporates liquid metal into the structure and exterior of the device to keep it slim and light.
