Winning Reason

The innovative 75% split ROG gaming keyboard allows gamers more space to play. It features the ROG HFX magnetic axis V2 and Hall sensing technology, enhancing trigger precision to 0.01mm. The M703 model offers adjustable keyboard response speed and lighting. The new ROG SpeedNova increases polling rate to 8000Hz, and the wireless ROG keyboard has a battery life of up to 151 hours. The integrated four-layer cushioning design provides a softer feel when typing, absorbing key vibrations and reducing keystroke noise. The keyboard can be adjusted to different angles and inclinations to meet gamers' needs, ensuring smooth keystrokes and rapid feedback for the ultimate gaming experience.

Product Feature

M703 features a split keyboard design, allowing players to adjust placement for greater flexibility and more mouse space. Equipped with ROG HFX Magnetic Switches V2 and Hall sensor technology, it offers 0.01mm actuation precision for ultra-fast response and a refined keystroke feel, delivering a superior gaming experience. The multi-function wheel enables instant actuation, volume, and lighting adjustments without extra software. With ROG SpeedNova 8K wireless technology, M703 supports 8000Hz polling rate and extends battery life to 610 hours (RGB off) for exceptional stability. Beyond gaming, four-layer dampening foam reduces keystroke noise for a purer feel. The detachable wrist rest with an adjustable structure ensures ergonomic comfort for both gaming and everyday use.
