Winning Reason

The ROG Zephyrus DUO (2026) redefines the gaming laptop experience with dual 16-inch high-specification displays and a versatile multi-mode design, allowing gaming, creation, presentation, and collaboration to coexist seamlessly on a single device. By extending the display real-estate, it integrates multitasking efficiency, interactive sharing, and immersive experiences into a sophisticated hardware architecture. Complemented by high-efficiency cooling and flagship performance, the dual-screen setup transcends being a mere novelty to become a core innovation that genuinely elevates both productivity and entertainment.

Product Feature

Dual 3K touchscreen Nebula HDR Displays with OLED offer unparallelled flexibility, both supporting 120Hz. The Duo integrates with ScreenXpert to seamlessly manage multitasking with intuitive window management and maximize productivity across both screens. A hybrid input experience offers flexibility and comfort for both work and play by combining a physical keyboard, a large touchpad, and touchscreens. The Duo’ s 150W NVIDIA® GeForce RTX™ 5090 Laptop GPU stays cool with a vapor chamber, liquid metal, and a kickstand that offers access to ample fresh air in multiple orientations. Featuring a hinge with 320° of travel, it offers 5 distinct operating modes, ready for any scenario.
