### Winning Reason

The ROG G1000 Edition 20 redefines desktop gaming with a rare, integrated design philosophy, harmonizing AniMe Holo holographic visuals, high-performance components, and a robust all-in-one liquid cooling system with exclusive anniversary branding. Beyond its flagship performance, the system establishes a powerful product narrative and immense collectible value. It breaks the industry mold of competing solely on specifications, delivering the ultimate experience where cutting-edge technology meets sophisticated design aesthetics.

### Product Feature

This 20th Anniversary Limited Edition features an exclusive Black & Gold colorway, blending matte textures with gold accents for ultimate collectability. The world's first prebuilt gaming PC to feature the AniMe Holo holographic fan system, allowing users to showcase ROG icons or custom animations via Sync, Fusion, and Solo modes. The Tri-zone airflow design isolates CPU, GPU, and PSU airflow. The ROG Thermal Atrium with a 420mm AIO cooler draws fresh air directly, reducing intake temps by up to 16°C. Powered by AMD Ryzen 9 9950X3D and ROG Astral RTX 5090, with 128GB DDR5, it delivers uncompromised performance. The chassis features geometric aesthetics and energy-guide lighting. With a physical Fan Key and total dust protection, it's a masterpiece of tech and luxury.
