EXPERT P35S External SSD (One-Click Data Destruction)

TEAMGROUP

Team Group Inc.
十銓科技股份有限公司

Winning Reason

A pioneering, patented one-touch data destruction system equipped with an advanced anti-accidental trigger mechanism. This solution features a proprietary 'Persistent Destruction' function, ensuring that sensitive data erasure remains uninterrupted even during power failures. By streamlining complex security protocols into an instantaneous process, it provides the most intuitive and ultimate cybersecurity application for high-sensitivity data. A recipient of the 2026 Taiwan Excellence Award and the Red Dot Design Award.

Product Feature

Engineered for professionals handling sensitive information, this SSD redefines data security with its groundbreaking "One-Touch Destruction" feature. In emergencies or imminent threat of theft, triggering this mechanism initiates an instant, irreversible hardware-level wipe. No advanced forensic tool can ever recover the erased files. Complementing this ultimate fail-safe, the drive features robust AES-256 encryption and a rugged, shock-resistant design. It perfectly balances top-tier security with blazing-fast transfer speeds for managing massive projects on the go. Your confidential data remains strictly under your control—and can be permanently obliterated the moment it risks falling into the wrong hands, giving you absolute peace of mind.
