Winning Reason

As a pioneer in the networking industry, the ROG Rapture GT-BN98 Pro introduces WiFi 8 and a Multi-AP coordination architecture, integrating intelligent path optimization, dynamic bandwidth management, and a patented thermal design. It is engineered to meet the rigorous demands for low latency, high stability, and sustained performance in high-density connection environments. Beyond leading-edge specifications, the GT-BN98 Pro excels by transforming complex network tuning, security management, and device load balancing into an intuitive user experience, providing a future-proof wireless solution for gaming, streaming, and smart home ecosystems.

Product Feature

The ROG Rapture GT-BN98 Pro is a flagship gaming router featuring next-gen WiFi 8 technology. It leverages advanced spectrum management and multi-link transmission to maximize bandwidth efficiency and minimize latency. Even in high-density environments, it ensures stable connectivity for gaming, 8K streaming, and cloud apps. Equipped with 10Gbps wired ports, it seamlessly integrates NAS and workstations for professional-grade networking. Exclusive ROG gaming acceleration prioritizes traffic to reduce lag and congestion, while ASUS AiMesh support enables seamless whole-home coverage. Combining extreme performance with scalability, the GT-BN98 Pro is a future-ready platform built for the era of AI, XR, and smart home ecosystems.
