

## Category Award Peripherals & Accessories

**STRIKE ALLOY TMR & STRIKE  
NEXUS**

**Micro-Star International**  
微星科技股份有限公司

### Winning Reason

Introducing the market's first 'TMR Magnetic Switch x Modular Touchscreen x External SSD' integrated ecosystem keyboard. By unifying high-speed input, a modular interface, and high-capacity storage, this device transcends its traditional role to become a comprehensive desktop control center. It delivers elite competitive performance with input latency 5 to 10 times lower than conventional magnetic switches. Combined with dual-layer data security for the external SSD, it is the definitive solution for high-stakes gaming, professional content creation, and mobile workstations.

### Product Feature

STRIKE ALLOY TMR WIRELESS is a high-performance keyboard for gaming, content creation, and productivity. It supports up to 8KHz polling in wired and 2.4GHz wireless modes, with Rapid Trigger and 0.01mm precision for faster, more accurate control. Its hybrid hot-swappable design supports both magnetic and mechanical switches for greater flexibility. With wired / 2.4GHz / Bluetooth 5.3 tri-mode connectivity, it enables stable multi-device switching. Paired with the STRIKE NEXUS multifunction display, it adds a 4.3-inch touchscreen, M.2 SSD enclosure, USB-C display with 10Gbps transfer, hardware password unlocking, and real-time system monitoring for a smarter, more secure, and more efficient user experience.
